Face shield

Instruction for use

In the style of European Regulation (EU) 2016/425

Intended use:
Face shield for use according to your own assessments.

Important note for protection against COVID-19:
Face shield does not offer respiratory protection against viruses or particles. Only particle-filtering half masks according to DIN EN 149:2009 with the appropriate FFP and certification offer this.

Scope of delivery:
Face shield, Instruction for use

Safety instructions:
Improper use of the product can result in injury.
Do not place the face shield close to heat sources (> 50 °C).

Warnings:
The face shield could cause allergic reactions with sensitive people.
Scratched or damaged lenses should not be used.

Assembly instructions:
You can find detailed instructions regarding the assembly, changing the visor and adjusting the size in our shop under the tab videos: https://ipp-nbg.de/produkt/gesichtsvisier/
or per QR code:

Cleaning:
Wipe the face shield with a soft, clean cotton cloth.
For stubborn stains, clean and dry the visor with a water dampened cloth or a suitable detergent solution (no benzene, solvent, petrol or other strong solvents).

Disinfection:
The face shield can be disinfected with disinfectants based on the following substances:

<table>
<thead>
<tr>
<th>PVC-Visier</th>
<th>PET-Visier</th>
<th>PMMA-Visier</th>
</tr>
</thead>
<tbody>
<tr>
<td>Isopropanol 70 - 100 %</td>
<td>Isopropanol 70 - 100 %</td>
<td>Methylated spirit (Alcohol)</td>
</tr>
<tr>
<td>Methylated spirit (Alcohol)</td>
<td>Methylated spirit (Alcohol)</td>
<td>Vinegar essence 25 %</td>
</tr>
<tr>
<td>Vinegar essence 25 %</td>
<td>Vinegar essence 25 %</td>
<td>Hydrogen peroxide 3%</td>
</tr>
<tr>
<td>Hydrogen peroxide 3%</td>
<td>Hydrogen peroxide 3%</td>
<td>Hydrogen peroxide 3%</td>
</tr>
</tbody>
</table>

If the dosage is too weak, the solution is ineffective and using too high of a dosage causes damage to the face shield.
Pay attention to exposure times! Disinfection and cleaning solutions must be renewed regularly, otherwise they will lose their effectiveness.
Do not use ultrasonic cleaning systems to clean the face shield.

Further information, storage:
Protect the face shield from dirt when not in use. Replace scratched or damaged visors.

Disposal:
The face shield is made out of plastic and metal. Please note the national disposal regulations applicable in your country.

Spare parts:
Visors can be reordered from the manufacturer.
